INTERDISCIPLINARY STUDIES

INTERDISCIPLINARY STUDIES: GRADE 11 – OPEN

Community Environmental Leadership

This website provides valuable resources in support of the following goals for this study package of courses: relating to the natural world; living responsibly on the earth; conducting research on environmental issues; exploring the local bioregion. The website can also be used to assist in developing programming for an outdoor education program for elementary students.

Local Field Studies and Community Links

This website provides valuable resources in support of the following goals for this study package of courses: field studies; research activities; field trips; projects with a community partner (we invite the participation of local students in the many projects that are ongoing at the Hamilton Naturalists' Club including field studies, monitoring and outdoor environmental education); planning a community-based environmental project. The website can also be used to assist in developing programming for an environmental education camp for elementary students.
